THE BLOOD. This compound will be found a great pro-moter of health, when taken in the spring, to expel the foul humors which fester in the blood at that season of the year. By the time ly expulsion of them many rankling disorders are nipped in the bud. Multitudes can, by the aid of this remedy, spare themselves from the endurance of foul cruptions and ulcerous sores, through which the system will strive to rid itself of corruptions, if not assisted to do this through the natural channels of the body by an alterative medicine. Cleanse out the vitiated blood whenever you find its impurities bursting through the skin in pimples, cruptions, or sores; cleanse it when you find it is obstructed and sluggish in the veins; cleanse whenever it is foul, and your feelings will tell you when. Even where no particular disorder is felt, people enjoy better health, and live longer, for cleansing the blood. Keep the blood healthy, and all is well; but with this pabulum of life disordered, there can be no ting health. Sooner or later something must go wrong, and the great machinery of life is disordered or overthrown.

Sarsaparilla has, and deserves much, the reputation of accomplishing these ends. But the world has been egregiously descrived by preparations of it, partly because the drug alone has not all the virtue that is claimed for it, but more because many preparate pretending to be concentrated extracts of i contain but little of the virtue of Sarsaparilla. or any thing else. During late years the public have been mis-

led by large bottles, pretending to give a quart of Extract of Sarsaparilla for one dollar. Most of these have been frauds upon the sick, for they not only contain little, if any, Sarsaparills, but often no curative properties whatev-er. Hence, bitter and painful disappointment as followed the use of the various extracts of Sarsaparilla which flood the market, until the sain is felt under the shoulder name itself is justly despised, and has become synonymous with imposition and cheat.
